EXAMINER'S AMENDMENT

Following entry the amendment filed 9/05/2003, the claims 26 and 30-36 are pending.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stephen C. Macevicz on 11/24/2003.

2. The application has been amended as follows:

Cancel claim 26.

In claim 35, line 2, after "said second reagent", delete "is" and substitute therefore -- comprises --.

In claim 36, line 2, delete "sensitizer" and substitute therefore -- second reagent --.

3. The following is an examiner's statement of reasons for allowance:

No prior art has been found teaching or suggesting a set of specific binding pairs for detecting the presence or absence of one or more target compounds, the set comprising a plurality of pairs of first reagents and second reagents in which the first reagent and the second reagent of each pair being specific for the same target compound, the first reagent of each pair being selected from the group defined by the formula: $[(D,M-L)]_k-T$, the second reagent of each pair being capable of generating an active species to cleave the cleavable linkage between the target-binding moiety and an eTag reporter and the active species being selected from the group consisting of singlet oxygen, hydrogen peroxide, NADH and hydrogen radicals.

Art Unit: 1637

The closest prior art is the reference of Van Ness et al. (6,027,890, issued February 22, 2000). Van Ness et al. disclose a variety of first and second member of a ligand pairs in which one or more members used in the method is tagged (See column 2, lines 14-27) and the tag is cleavable by oxidation (See column 4, lines 16-24). However, the ligand pairs do not have a second member which is capable of generating an active species to cleave the cleavable linkage between the target-binding moiety and the tagged portion and the active species being selected from the group consisting of singlet oxygen, hydrogen peroxide, NADH and hydrogen radicals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is 703 (305) 7112. The examiner can normally be reached on Monday - Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703 308 1119. The fax phone number for the organization where this application or proceeding is assigned is 703 (305) 3014.
